
Socrates Releases English Language Arts Module

October 8, 2018, Las Vegas, Nevada – Education Revolution, LLC, the creator of the award-winning Socrates Learning Platform, today announced the launch of its latest education module, English Language Arts (ELA). Socrates English Language Arts creates customized learning paths across hundreds of ELA common core categories, allowing each student to advance at their own pace.

“We are excited to release our new English Language Arts learning module as it represents a major leap forward in terms of what is available to elementary students today,” stated Grace Funcion, Education Revolution’s new VP Curriculum Design. Our first release is targeted towards elementary school students, for struggling readers, and children with learning disabilities. In addition, it is a great resource for children whose native language is not English – both in the United States and abroad.”

“We have had significant demand for us to add an English Language Arts learning module. This was not only from our existing users but from the market in general,” stated Brian G. Rosenberg, Education Revolution’s Chief Executive Officer. “This new learning module further strengthens Socrates’ value to our current and potential customers. As we continue to expand our learning modules, the power of Socrates in helping teachers and students grows.”

The Socrates English Language Arts module begins with the fundamentals of reading: phonics and word recognition. Students begin with letter and sound recognition to build essential word decoding skills that form a strong foundation to ultimately create confident readers. This module can also be used to assist struggling readers or English Language Learning (ELL) students who do not speak English as their first language. Because reading, writing, speaking, and listening are necessary skills across multiple subjects, Socrates has a very strong focus on early development of English literacy skills and concepts.

About the Socrates Learning Platform for School Students

Socrates is a revolutionary learning platform that dynamically adjusts to the individual learning needs of each student across any educational content. Socrates is already deployed in elementary and middle schools. Socrates is directly available to students, teachers, schools, parents/guardians (including for homeschooling) and libraries. Socrates includes Teacher and School Command Center Modules that provide a powerful teacher assistant that lets teachers know when and where each student needs help. The Testing and Benchmarking Module allows teachers to automatically create, administer, grade and compare tests to quickly and with-ease evaluate student progress. The Parent Command Center Module connects the home and classroom. Socrates games and gamification keep the child wanting to play more – the more they play, the more they learn. www.learnwithsocrates.com

About Education Revolution, LLC

Education Revolution, LLC is rapidly becoming a leader in online education with its award-winning Socrates Learning Platform. The Platform is already being used in elementary and middle schools and the range of educational content provided is steadily growing. Socrates includes a unique dynamic learning engine that adjusts the content to precisely match the learning needs of each student, resulting in students learning up to three times faster, and retaining that knowledge. The National Science Foundation awarded Socrates with a grant in recognition of its unique innovation and significant societal benefit. www.withsocrates.com
