SOCRATES
FOR CLASSROOMS

> "Classrooms today are filled with students with such diverse backgrounds and diverse abilities. Socrates creates a unique learning pathway for each student based on their individual abilities and learning style. Every classroom would benefit greatly from Socrates."
>
> *Grace Funcion, Teacher*

ABOUT SOCRATES

The Socrates E-Learning Platform creates a customized Learning Pathway for each student. This Learning Pathway is a one-to-one match for each student based on their own learning abilities and also their own particular learning style. With Socrates, students learn more and faster!

WITH SOCRATES

✓ Students learn up to three times faster

✓ Students have fun while they learn

✓ Teachers can easily see which students need help and where to help them

✓ Teachers can set and grade tests automatically and track student performance over time

✓ See detailed data showing student and classroom performance

✓ It just takes a few minutes to set up

The National Science Foundation awarded Socrates with a grant in recognition of its unique and significant societal benefit.

SOCRATES FOR CLASSROOMS

Students learn up to three times faster

The Socrates engine uses robust data computation to place students into customized learning paths based on their own natural abilities and learning style. This form of artificial intelligence ensures that students encounter questions that are never too hard or too easy. Active users advance three times faster than a traditional education path.

Teachers can easily see which students need help and where to help them

With the Teacher Command Center, teachers can easily see which students are struggling and on what topics. Help can be assigned on a student-by-student basis by groups, or the whole class.

See detailed data showing student and classroom performance

View student, classroom, or grade level reporting. See overall performance and even drill-down to how individual questions were answered by a student. See growth, track progress, and real-time activity. Print reports with a single button.

Students have fun while they learn

Socrates features an extensive library of games which encourage, reward, and engage students. Students collect tokens and tickets by answering content-related questions. When they play more, they learn more.

Teachers can set and grade tests automatically and track student performance over time

Automatically create, administer, grade, and compare tests to evaluate student progress throughout the year. Set tests in advance, create timed tests, and provide testing instructions. Questions are automatically graded as they are submitted by the student.

It just takes a few minutes to set up

As a cloud-based solution, Socrates is highly flexible, scalable, and secure. A classroom can be set up with minimal time and effort - usually in just minutes. Being cloud-based, Socrates can go-anywhere and be-anywhere internet is available. No need to worry about updates – you will always have the latest version of the software.

TESTIMONIALS

"It's really fun to answer questions and get a break to spend tokens and play games."

Age 6

"Socrates is fun! My favorite game is the pizza party."

Age 7

"It's really fun and easy, very cool. I rate this 5 stars!"

Age 10
