

SOCRATES FOR LIBRARIES

"Libraries have an increasing role as community education centers including for homeschooling. Socrates is a great online educational tool that helps meet these needs in a highly-effective way, and should be offered by all libraries."

*Dr. Ronald R. Heenzan, Ph.D, Executive Director,
Las Vegas-Clark County Library District*

ABOUT SOCRATES

The Socrates E-Learning Platform creates a customized Learning Pathway for each student. This Learning Pathway is a one-to-one match for each student based on their own learning abilities and also their own particular learning style. With Socrates, students learn more and faster!

The National Science Foundation awarded Socrates with a grant in recognition of its unique and significant societal benefit.

WITH SOCRATES

- ✓ Your library's role as a modern learning center is enhanced

SOCRATES FOR LIBRIARIES

Your library's role as a modern learning center is enhanced

Libraries are increasingly recognized as modern community-based learning centers, especially for homeschoolers. Accordingly, libraries need to have appropriate and fit-for-purpose educational tools. Socrates gives libraries the power of individualized instruction to students. The National Science Foundation has recognized Socrates for its unique and significant societal benefits.

Each library can have their own library-branded login page

Libraries receive a customized URL for their members and a landing page branded with their own library logo. Members simply enter their library card number to gain access. Libraries will also have access to monthly usage reports, promotional materials, chat and email support, Socrates for tutoring, and other in-library initiatives.

Students learn up to three times faster

The Socrates engine uses robust data computation to place students into customized learning paths based on their own natural abilities and learning style. This form of artificial intelligence ensures that students encounter questions that are never too hard or too easy. Active users advance three times faster than a traditional education path.

Students have fun while they learn

Socrates features an extensive library of games which encourage, reward and engage students. Students collect tokens and tickets by answering content-related questions. When they play more, they learn more.

Your library can cater to a wide-range of ages and student abilities

Socrates uses grade level to provide an initial starting point in the learning pathway. After that, each student learns at their own pace, subject by subject and topic by topic. So, regardless of student ability or learning style, Socrates has them covered.

It just takes a few minutes to set up

As a cloud-based solution, Socrates is highly flexible, scalable, and secure. A library can be set up with minimal time and effort – usually in just minutes. Being cloud-based, Socrates can go-anywhere and be-anywhere internet is available. No need to worry about updates. Your members will always have the latest version of the software.

TESTIMONIALS

“

“It's really fun to answer questions and get a break to spend tokens and play games.”

Age 6

“

“Socrates is fun! My favorite game is the pizza party.”

Age 7

“

“It's really fun and easy, very cool. I rate this 5 stars!”

Age 10
